

SV HOUSE

BY STUDIO.609

YEAR: 2025 LOCATION: AHMEDABAD
PHOTOGRAPHY: CHETAN JAIN

Nestled in *Ahmedabad*, this modern bungalow with biophilic design interior is crafted for a family of four, seeking a harmonious blend of contemporary elegance and natural serenity. Designed by an architect, the project reflects a deep commitment to biophilic design interior principles, integrating earthy tones, sustainable materials, and open layouts to create a home that resonates with both functionality and aesthetic appeal.

TEXT DESCRIPTION
BY STUDIO.609

The design concept for the residence centres on a modern biophilic interior theme, inspired by the desire to bring the outdoors in while maintaining a sleek, urban sensibility. Biophilic design emphasizes a connection with nature, using natural light, greenery and organic materials to enhance well-being. For this family of 4, comprising a couple and their two young adults. The goal was to create a home that serves as a sanctuary from the bustling city life, promoting relaxation, interaction, and a sense of calm. The theme incorporates warm wood tones, neutral and earthy colour palettes, and an open layout to foster a fluid, welcoming environment. Unique lighting fixtures and strategic placement of indoor plants further amplify the natural connection, while functional spaces cater to the family's daily needs. The Scandinavian-inspired design, infused with bohemian warmth, forms the backbone of the aesthetic. This approach balances minimalism with textured layers, ensuring the space feels both uncluttered and lived-in. The location in Ahmedabad, known for its rich cultural heritage and evolving modern landscape, influenced the use of locally sourced materials and craftsmanship, aligning with the studio's sustainable ethos. The result is a home that reflects family's values- comfort, togetherness, and an appreciation for nature – while staying rooted in the local context.

A COLLABORATION, WHERE INPUTS SHAPED THE DESIGN

We desired an open plan living area for family gatherings, a cosy yet stylish bedroom retreat, and a dining space that doubles as a social hub. Sustainability was a key concern, prompting the use of eco-friendly materials and energy-efficient solutions. Their trust in the studio's expertise led to a collaborative process, where their input shaped a design that reflected their lifestyle in Ahmedabad's dynamic setting. The open planning helps to keep the whole house together rather than splitting all spaces. The studio proposed a layout that maximises natural light and ventilation, key elements of the biophilic theme. The living area was envisioned as the heart of the home, featuring a plush beige sectional sofa adorned with vibrant cushions in earthy hues. A sleek wooden coffee table, anchors the space, while a striped rug with warm tones adds texture.

A STORY OF TOGETHERNESS, GROWTH, AND HARMONY

Interior plays a major part with its warm tones. When you enter the house, you are completely isolated from the context and get a whole different vibe and aesthetics, though the context is just a few feet away. The daughter's bedroom incorporates a playful yet functional design, with a floral mural in soft pink adding whimsy, paired with a wooden bed and a built-in desk for study. The use of wood panelling and textured fabrics creates a warm, inviting atmosphere. The

daughter's bedroom delights with its floral mural and practical layout, fostering creativity and focus. This residence stands to show the ability to blend modern design with nature-inspired elements. Located in Ahmedabad, it serves as a model for sustainable living, proving that luxury and eco-friendliness can coexist. For a family of four, it is more than a home- it is a space where every corner tells a story of togetherness, growth, and harmony with the landscape.

Studio.609, Ahmedabad

By Archita Patel

Studio 609 Designs approaches interiors through a refined balance of contemporary elegance, functionality, and spatial warmth, crafting environments that feel both sophisticated and deeply livable. Their work reflects a strong sensitivity towards detailing, material harmony, and experiential design, resulting in spaces that are timeless, immersive, and thoughtfully curated.
